Subject: DPL RFP-Public Comment

Dear Ms. Nickerson,

Please forward the following comment to the PSC Commissioners and all other agencies involved, and enter a copy of this into the public record. Thank you very much. el

Dear Commissioners:

The Conectiv/DPL/Pepco protest --of the May 2007 PSC order for Bluewater Wind/ Gas Back-Up Energy Plan--is where 'outrageous' and 'absurd' intersect. It's difficult to take their arguments seriously except for the fact that it has been made quite clear that this corporate entity and its management, directors and counsel will do and say whatever they feel necessary to sabotage what they think is not in their best financial interest....even when it has been determined through a long and vigorous process that it is in the public's best interest. I wonder how many people bellowed a deep guffaw after reading of DPL/Conectiv management's dismay at PSC's "capitulation to public opinion." They must have been quite stunned that public interest actually overrode corporate interest.

This process was concluded in May with integrity, and good decisions were made.

It is my fervent hope that our decision makers do not 'capitulate' to the whims of corporate heads who are attempting to defy outcomes they do not like. Perhaps they should be reminded that the State of DE could take over the negotiations if DPL will not do so in good faith.

Thank you for your time in considering these comments.

Best regards,
Ellen Lebowitz
